Lift shaft structure

CMAlifts was founded in 2001 with a far-sighted view by the brothers, Messrs. Giulio and Gaetano Caputo. It is an international leading manufacturer operating in the design, construction and assembly of lifts, platform lifts and elevators for civil and industrial use. This industrial reality has continuously kept inside an artisan heart, so much to blend futuristic hi-tech solutions with the mastery of its workforce.

CMAlifts' reference marketplace has no boundaries. Deeply rooted in the national Italian territory, CMAlifts is a leading player in Europe, North Africa, Middle East and Australia. The constant increase in orders from foreign trades has been the result of a widespread presence at national and international trade fairs. Strengthened by the experience gained over time, specific technical and design demands are assessed and addressed with extreme care and expertise.

The working method of the company is based on professionalism and reliability, which characterize both the design and production, moving from the management of the order to the onsite delivery of the finished lift plant. No aspect of its business is outsourced, including logistics.
