

METAL LIFT SHAFT STRUCTURES

## Metal Lift Shaft Structure

---

CMAlifts works closely with architects and designers to keep up with the latest trends in the design world. Our metal structures comply with EN 1090 and our manufacturing processes meet strict quality criteria.

CMAlifts offers its customers:

- Metal structures for interior and exterior installations
- Galvanized sheet metal structures for coastal/seaside areas
- Slim structures for reduced spaces (only for interior)

### Features

- start base for the metal structure assembly
- tailor-made pit and overhead uprights
- intermediate crossbeams (fixed distance 3000 mm)
- access side crossbeams (adjustable)
- guide rail side crossbeams (fixed distance 1500 mm)
- cabin top
- aeration
- horizontal and vertical glass beads
- guide rail connection brackets
- RAL painting colours
- high strength bolts 8.8
- planning and calculation of structures

### Accessories

- Structural reinforcement bracing by means of steel cables
- cabin top with single or double slope
- Aeration system with jalousie louver on infill or by means of air ducting on cabin top
- Infill realized in RAL painted metal sheets, insulating panels or glass (clear, bronze, smoked, white, stopsol)

### Notes

Our structures include RAL colour painting of all hoistway components. Powder-coated painting based on carboxylate polyester resins ensures excellent resistance to light, heat, atmospheric agents, chemicals and salt spray.

 SLIM shaft structure for the interior with automatic double-leaf landing doors

CMAlifts metal structures are perfectly integrated into all types of indoor environment thanks to the possibility of different customization types to be realized in harmony with the cabin. The lift thus becomes a perfectly integrated interior design component.

 Metal lift shaft structure suitable for private interior installations.

▶ Panoramic lift shaft structure suitable for business interior installations. The transparency of the glass offers the environment light and elegance while protecting the lift hoistway.

Platform structure for indoor installations for private use. Realized in mirror-polished stainless steel and protected by a laminated glass. It comes with panoramic landing doors.

 Lift shaft structure suitable for interior installations for the general public.

 Lift shaft structure suitable for vintage buildings open to the general public.

SLIM shaft structure for reduced space which, thanks to the modularity of its elements, can be easily installed in a small space and in a short time.

SLIM shaft structure with hinged landing doors.

 Exterior shaft structure suitable for private use.

Exterior shaft structure suitable for industrial applications. 

## WHY CHOOSE CMAlifts

**RELIABILITY:** confident upward / downward travels whenever needed by the passenger, feeling sure of a plant which meets the strictest safety requirements.

**COMFORT:** travel comfortably, silently, without sudden accelerations or stops.

**AESTHETIC:** enjoy an elegant and versatile design able to satisfy the most particular tastes, and to adapt to different environments.

**CONVENIENCE:** reduced consumptions with state-of-the-art technologies and improved efficiency with next-generation travel management control systems.

**ENVIRONMENTALLY FRIENDLY FEATURES:** energy efficiency for environmental safeguard, thanks to the use of green supplies.

**BUILDING VALORISATION:** the installation of a lift contributes significantly to the preservation and increase in the value of the building.

CMAlifts, set up in 2001 with a far sighted vision by the brothers Giulio and Gaetano Caputo, is today a leading international company in the design, manufacturing and assembly of lifts and elevators for private and industrial use.

It is a company that has preserved a craftsmanship heart, combining futuristic high-tech solutions with the inventiveness of its employees.

CMAlifts' target market knows no boundaries. Deeply rooted in the Italian market, CMAlifts is also a protagonist in the Balkans and Northern Europe. Thanks to an increasingly widespread sectorial trade fair attendance, clients' orders from abroad have multiplied as time has gone by.

Standing strong with extensive experience, CMAlifts carefully and professionally handles all technical and design demands. The company's work method is based on the principles of professionalism and reliability, which characterize all phases from planning to production, from order management to on site delivery. No aspect of the business is handed over to external workforce (including logistics).
